SSW-321-D TELEPHONE

Stainless Steel, Vandal Resistant, Rugged Telephones Built to Last

The CEECO SSW-321-D model is a vandal resistant, high quality stainless steel, autodial telephone designed to automatically dial a pre-programmed number from one (1) to eleven (11) digits when the handset is lifted. Our rugged, industrial grade telephone is ideal for areas where a hotline or a single speed dial phone is needed. Also ideal for locations where call control is done by the user being automatically connected to an operator, who would then dial the allowed number, limiting the users' dialing access. Constructed with marine quality chrome mechanical or optional magnetic hookswitch, armored cord handset with internal steel lanyard, and installed with tamper resistant security screws providing durability that you can rely on. (Security tool is required for installation).

SSW-321-D TELEPHONE

PRODUCT MANUALS WITH FULL FEATURES AND FUNCTIONS AVAILABLE UPON REQUEST

SSW-321-D

Our standard vandal resistant, mini stainless steel wall autodial telephone model includes a 32" armored cord handset with steel lanyard, and backplate and is specifically designed for all areas subject to vandalism and frequent abuse.

SSW-321-D-M-IVC The SSW-321-D-M-IVC

model is equipped with the sealed magnetic hookswitch (M) & internal volume control with background noise reduction button on the face of the housing (IVC). This is commonly used in busy or noisy areas such as airport terminals, and busy waiting

The SSW-321-D-M-ACH12 model with the magnetic hookswitch (M) and 12" armored cord handset (ACH12) is commonly used in psychiatric and correctional facilities where the need for minimal moveable parts and shorter cords are necessary to reduce abuse to the unit and the user.

SSW-321-D-RIL

The SSW-321-D-RIL model with a Ring Indicator Light (RIL) is commonly used in noisy and busy areas where it is necessary to visually see the phone ringing such as dormitory hallways. distribution, and manufacturing facilities.

SSW-321-D-M-IVC-RIS

The SSW-321-D-M-IVC-RIS model with the magnetic hookswitch (M), internal volume control (IVC) and Ring Indicator Strobe Light (RIS) is commonly used where location recognition of phone activation is imperative, such as gas stations, airports, and other critical areas.
